

Whether your company requires training for Oracle® OBIEE, BI Publisher, Data Integrator, or Analytics, GP Strategies® is the training partner you need. GP Strategies provides onsite, private Oracle Business Intelligence training for corporate groups of four or more. As a leader in Oracle training, we know that even the finest courseware falls flat without world-class instruction, which is why our instructors are experienced implementation professionals. Get your project off on the right foot with our project-team training, and don't leave your end users in the dark—ask us about our user-adoption services!

OBIEE

OBI100 Dimensional Modeling 3 Days
This course is an introduction and overview of Dimensional Modeling. The course covers data warehousing, data design, and dimensional models.

Many DBAs and database implementers are very familiar with a concept known as "normalization". However, for a data warehouse, which is the type of data that is the most efficient for reporting in tools such as OBIEE, a "denormalized" model is the best solution, and many DBAs and database designers are less familiar with denormalized models, or why they are important in the data warehouse for analysis system. This course will also help DBAs and database implementers to understand these models.

The class is also quite appropriate for those who will be building the OBIEE metadata repository. A knowledge of dimensional modeling and an understanding of how to build an OBIEE repository will be complementary techniques that will play off each other in terms of building a really effective OBIEE system.

OBI375 OBIEE Repository & Security Management-12c 4 Days
Deliver meaningful real-time metrics, measurements and facts to your business users when you master the components in Oracle Business Intelligence Enterprise Edition (OBIEE). Our instructor-led courses cover the key elements in the OBIEE suite, including tools to build interactive dashboards, perform ad hoc analysis, configure information deliveries, alerts and produce reporting. This Administration course teaches the attendee how to set up and administer the three layers of an Oracle BI Repository – the Physical layer, the Business layer, and the Presentation layer. Attendees will learn to import schemas, design and build logical business models, and expose business models to users in Oracle BI Answers. Business users, data architects and developers – every member of your team will contribute to the success of your next BI project.

This course is appropriate for users of OBIEE 11g or OBIEE 12c.

OBI391 OBIEE Analyses, Dashboards, & Answers-12c 5 Days**
Deliver meaningful real-time metrics, measurements and facts to your CEO, CFO, and other business users when you master the components in Oracle Business Intelligence Enterprise Edition (OBIEE). Our instructor-led courses cover the key elements in the OBIEE suite, including tools to build interactive dashboards, perform ad hoc analysis, configure information deliveries, alerts and produce reporting. Business users, data architects and developers – every member of your team will contribute to the success of your next BI project. In this course, students use hands-on exercises to learn how to create tables, charts, narratives, pivot tables, and many other content objects available in OBIEE Answers, then learn to use OBIEE Dashboards to display those objects effectively.

**The full 5 day course includes both KPI functionality and Maps 4 day course can include either Maps or KPI functionality 3 day course does not include Maps and KPI functionality.

OBI392 Oracle 12c OBIEE New Features 1 Day
In this course, students use hands-on exercises to learn the new features in the 12c version of the Oracle Business Intelligence suite. In addition to enhancements to existing functions such as tables, pivot tables, and charts, students will also be introduced to new features such as Master-Detail linking, Key Performance Indicators, Scorecards, and a variety of other new functionality.

OBI395 OBIEE Answers & Dashboards-Advanced Topics 3 Days
In this class, we will explore several advanced OBIEE topics, many of which require interaction between the criteria columns, results views, and dashboard prompts.

OBI397 Oracle Visual Analyzer – 12c 1 Day
Oracle Visual Analyzer (VA) and its client-based sibling version called Oracle Data Visualizer Desktop (DVD) are components of Oracle's Business Intelligence product line directed toward users whose interactions with data may be typically characterized as more "ad-hoc" in nature than those users who typically use OBIEE (Oracle Business Intelligence Enterprise Edition). Featuring an interface that is styled after products like Tableau, VA and DVD provide a means of analyzing data quickly, without a lot of ramp-up time for education. In this course, we will explore only the Oracle Visual Analyzer. Our exploration will encompass two broad categories: Data: How do we find (and/or potentially prepare) data that we want to analyze with VA? Presentation: How do we create visualizations of that data?

BI PUBLISHER

OBI325 Oracle BI Publisher Enterprise Edition – 12c 3 Days
Oracle BI Publisher is a template-based publishing solution available within the Oracle Business Suite, within PeopleSoft, and also in a standalone version. Students familiar with desktop tools such as Adobe Acrobat, Microsoft Excel, and Microsoft Word will learn to create and maintain their own reports via the BI Publisher architecture. This class will cover the different options available within the BI Publisher Enterprise reporting portal and how to create a BI Publisher Enterprise online reporting application from scratch.

**This course covers features of BI Publisher Enterprise through release 12c

PSF300 XML (BI) Publisher 2 Days
This course provides participants with the essential skills in using, maintaining, and developing PeopleSoft BI Publisher reports. Through detailed explanations, classroom discussions, and hand-on activities, participants will learn how to register data sources, define report templates, and create report definitions. They will learn how to configure BI Publisher and set up BI Publisher security. This course also includes a thorough explanation of running and deploying BI Publisher reports, and troubleshooting common BI Publisher errors.

DATA INTEGRATOR

OBI461 ODI for BI Applications 11g 3 Days
This course is designed to show the common tasks within a BI Applications 11g implementation using Oracle Data Integrator (ODI) and corresponding system components such as OBIEE, Functional Setup Manager, and Configuration Manager. The intended audience for this course ranges from System Administrators to Data Warehouse Architects. Attendees should have experience in Dimensional Modeling and Database design as well as a thorough understanding of SQL.

Note that this course does not include information about Informatica, which was used as the ETL tool for BI Applications in 7.9.6.x, and Oracle does not currently have a migration utility to support this.
