Artificial Intelligence Solutions for Learning and Development

AI Readiness: **Is Your Organization Prepared to Embrace AI?**
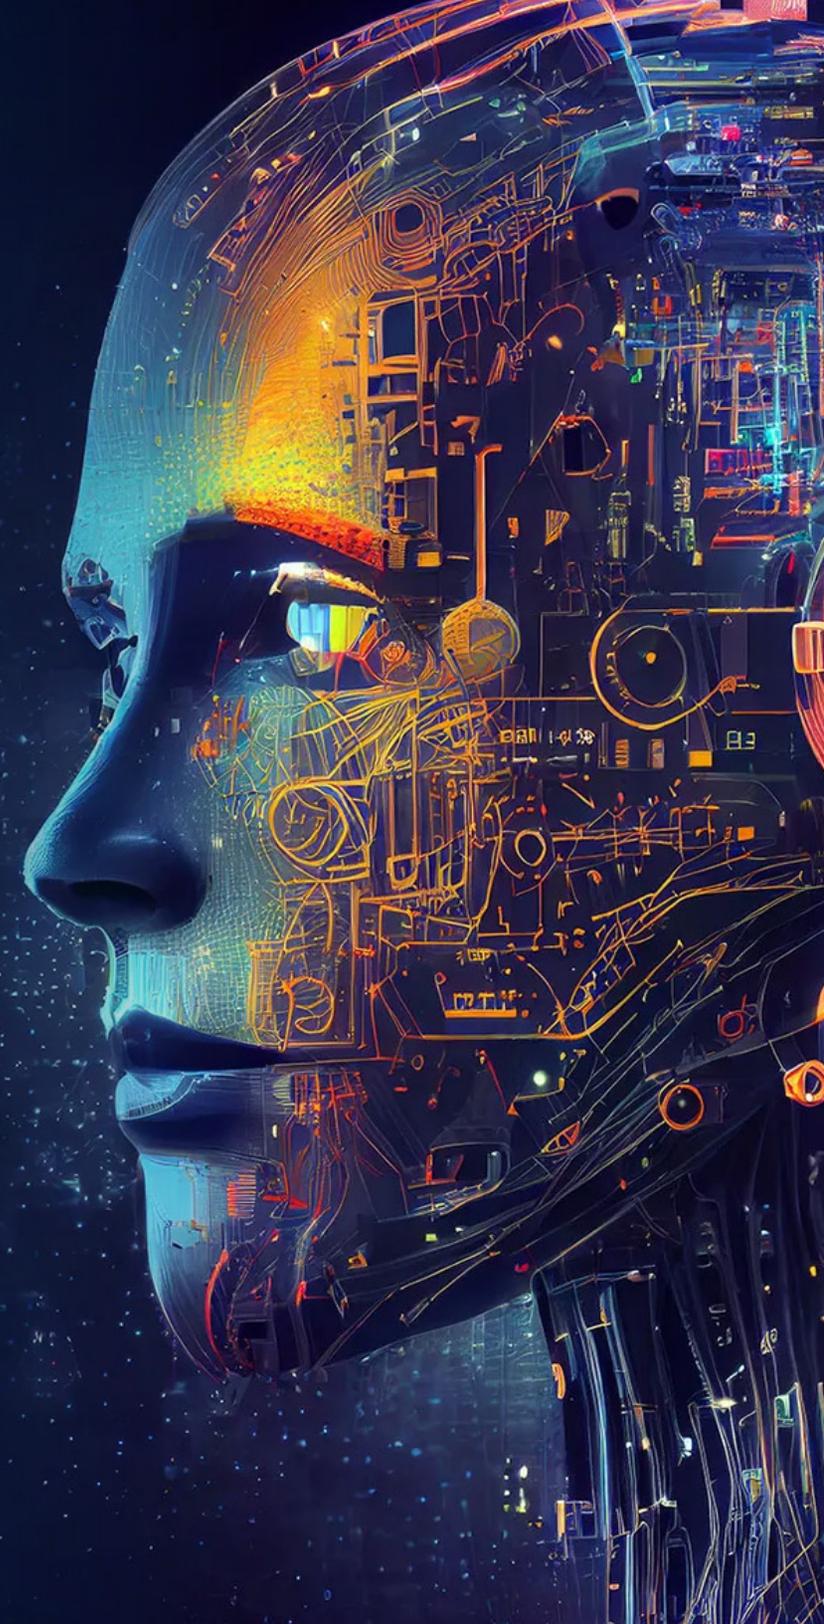

As the world's leading talent transformation partner, GP Strategies is dedicated to helping businesses realize artificial intelligence's (AI's) transformative potential and how it impacts their learning organizations.

We partner with organizations at three critical stages of AI readiness and integration:

AI Skills | Equip your people with the knowledge, skills, and expertise to use AI technologies.

AI Integration | Prepare your learning content and systems by adding tailored AI technologies into your workflows.

AI Elevation and Optimization | Upgrade existing AI technologies and ensure you get the most out of your systems and processes.

AI Services

Our integrated suite of services, which includes adaptable strategies, effective workforce training, and seamless adoption and change management, can help you maximize AI potential.

AI Consulting
Assess your AI needs and create a plan to achieve your goals. Our AI consulting solutions include analysis, alignment, recommendations, execution, and measurement.

AI Enterprise Skilling
Build an effective skilling strategy that enables AI applications and is accurate, flexible, and anchored to workflows.

AI Technology Implementation
Empower your people with expert strategies focusing on humans, not just technology. We provide the framework, execution, and measurement to drive adoption and change management.

AI Learning Solutions

Go from static to dynamic learning content. Our solutions include faster content design, optimized content libraries at scale, and more to help you unlock the power of your people and do what you couldn't before.

Learning Content AIQ
We built our solution from decades of learning experience. Learning Content **AI**Q includes an expert team of learning professionals utilizing our AI tool to map your learning data and generate information based on your content.

AI Training Program
Human+AI: Practical AI for Learning Leaders
Equip your learning leaders with the knowledge and skills to effectively use AI within your organization, learning and development function, and work.
